ABOUT ME

Full-Stack Developer with hands-on experience building production-grade web applications, REST/GraphQL APIs, and monorepos. Specialized in the Node.js ecosystem (Next.js, NestJS, Hono, Astro) and relational databases (PostgreSQL, MySQL), with experience deploying on Cloudflare serverless environments. Focus on writing clean, maintainable code and building fast, responsive user interfaces.

TECHNICAL SKILLS

- **Programming Languages:** TypeScript, JavaScript, Python, Ruby, SQL (PostgreSQL, MySQL), Liquid (Shopify), Dart
- **Frontend Development:** Next.js, React, Astro, Angular, Nuxt.js (Vue.js), Tailwind CSS, Bootstrap, Sass, Recharts
- **Backend & APIs:** NestJS, Hono.js, Express, Fastify, Ruby on Rails, GraphQL, REST APIs, WebSockets (Socket.io)
- **Databases & ORMs:** Prisma ORM, TypeORM, Mongoose, PostgreSQL, MySQL, SQLite, Cloudflare D1, Redis
- **Cloud & Infrastructure:** Cloudflare Pages/Workers/R2/D1, AWS S3, Supabase, Firebase Admin, Docker, RabbitMQ, Vercel, Railway, Git/GitHub/GitLab
- **Testing & Tools:** Cypress, Jest, Postman, Figma, Notion, Turborepo Monorepos

WORK EXPERIENCES

StageLink | *Full-Stack Engineer & Co-Founder*
March 2026 – Present (Startup)

- Co-developed a marketplace platform connecting performers and event organizers using a Next.js and NestJS monorepo.
- Built the NestJS backend API and designed a PostgreSQL schema using Prisma ORM with vector search extensions for semantic filtering.
- Implemented user onboarding workflows and role-based access control (RBAC) integrated with Firebase Admin authentication.
- Integrated the Omise payment gateway and Socket.io for real-time chat and system notifications.
- Designed and built a responsive admin dashboard using Next.js, TanStack Query, and TanStack Table to manage platform metrics.
- Configured build pipelines and deployed the application on Cloudflare Pages using OpenNext.

THAI THAI THAI UNIVERSE CO., LTD. | *WebApp Developer & Systems Engineer*
May 2025 – Present (Part-time)

- Maintained and implemented features for client web applications using Next.js, Astro, Hono.js, and Shopify Liquid templates.
- Developed a loyalty platform using Astro (frontend) and Hono.js (backend), deploying it on Cloudflare Workers with D1 and R2 for receipt verification workflows.
- Built a Turborepo monorepo for the Craft Beer and Traditional Brewing Association (CBTA) platform, linking NestJS and Next.js with MySQL and Prisma.
- Integrated Resend API for transactional email notifications and Omise for payment processing.
- Created data synchronization scripts using the Google Sheets API to automate content and logo updates.

Freelance Full-Stack Developer | *Independent Contracts*
November 2025 – May 2026

- **Real Estate Platform (betterLiving):** Developed a bilingual real estate search platform with Next.js and Fastify. Designed a PostgreSQL schema with spatial indexing and integrated Mapbox GL JS.

- **MayClinic System:** Designed and developed a bilingual clinic management system using Next.js, next-intl, and AWS S3.
- **Tokio Marine Frontend:** Built responsive, static pages for client insurance portals using Next.js and Tailwind CSS.

T.S. PRINTING 2002 CO., LTD. | *Software Engineer*
April 2024 – August 2024 (Part-time)

- Developed user interfaces for POS and ERP applications using Next.js, Angular, and Tailwind CSS.
- Constructed interactive analytics dashboards using Recharts to present real-time sales and inventory insights.
- Rebuilt legacy Go-based RESTful APIs using Ruby on Rails to improve maintainability and simplify database interactions.
- Implemented secure JWT-based authentication systems and database migrations in Rails.

NUD Channel | *Backend & Frontend Developer*
October 2020 – July 2023

- Designed and implemented a NestJS-based accounts service using GraphQL and MongoDB.
- Implemented RabbitMQ message broker for asynchronous event distribution.
- Developed the admin panel frontend using Nuxt.js and Vuetify components.

Individual Projects

Portfolio website / Fullstack Developer
Ongoing

auhip — Personal AI Assistant

- Built an offline-first desktop AI assistant featuring voice activation, Ollama model intent routing, and hand gesture controls.

EDUCATION

Naresuan University Secondary Demonstration School / Science-Mathematic Program
June 2022 - March 2025

Mahidol University / Bachelor of Science in Digital Science and Technology
August 2025 - Present
